Our family agreement on AI and homework

We write it together and review it in a month. If the school's rules are stricter, they apply.

Group	Tasks	Condition
● Allowed	Explain an idea I didn't understand · practice questions for myself · check an answer I wrote	Afterwards I explain what I understood with the screen closed
▲ Ask first	Ideas for a project · translate a text to understand it · correct the language of my writing · a new app	I write at the end of the homework: “I used an AI tool for: …”
■ Not allowed	Write my essay or report · solve homework for me to copy · answer in a test or marked work · my photo, full name, school, phone number	—

The school's rules we read, and where we found them

Tasks we are adding, and the group for each

After every use: I explain what I understood in two minutes, and solve a similar question alone

If I break a rule: I redo that part myself, and “allowed” becomes “ask first” for a week

The tool we use · whose account · its minimum age in its terms

Review date · signatures
